Problem

Statement:-

Library Book Catalog: Create a searchable catalog for "City Central Library."
Display books in a table with columns for Title, Author, ISBN, and Availability (use color coding). Include a search/filter box.

CODE :-

```
ANGAD EXP - Notepad
File Edit Format View Help
<html>
<body style="background-color: aqua; font-family: Arial; color: black;">

<h1 style="text-align: center; color: darkblue;">
City Central Library
</h1>

<nav style="text-align: center; margin-bottom: 15px;">
<a href="#home" style="margin-right: 10px; color: darkblue;">Home</a> |
<a href="#books" style="margin-right: 10px; color: darkblue;">Books</a> |
<a href="#contact" style="color: darkblue;">Contact</a>
</nav>

<section id="home" style="text-align: center;">
<p>Welcome to the City Central Library catalog.</p>
</section>

<br>

<div style="text-align: center;">
<input type="text" placeholder="Search by title" style="padding: 5px; width: 200px;">
</div>

<br>

<section id="books">

<table border="1" style="margin: auto; border-collapse: collapse; width: 80%;">

<tr style="background-color: lightblue;">
<th>Title</th>
<th>Author</th>
<th>ISBN</th>
<th>Availability</th>
</tr>

<tr>
<td>Book One</td>
<td>Author A</td>
<td>1000</td>
<td style="color: green;">Available</td>
</tr>
```

ANGAD EXP - Notepad

File Edit Format View Help

```
<tr>
<td>Book Two</td>
<td>Author B</td>
<td>2222</td>
<td style="color: red;">Not Available</td>
</tr>

<tr>
<td>Book Three</td>
<td>Author C</td>
<td>3020</td>
<td style="color: green;">Available</td>
</tr>

<tr>
<td>Book Four</td>
<td>Author D</td>
<td>4200</td>
<td style="color: red;">Not Available</td>
</tr>

<tr>
<td>Book Five</td>
<td>Author E</td>
<td>5555</td>
<td style="color: green;">Available</td>
</tr>

</table>

</section>

<br>

<section id="contact" style="text-align: center;">
<h3>Contact</h3>
<p>Email: library@email.com</p>
</section>

</body>
</html>
```

Tags Used :-

<html>

**This is the root tag of the whole webpage.
Everything inside it is part of the HTML document.**

<body>

Contains all the visible content of the webpage.

You also added styles like:

background-color: aqua → page background color

font-family: Arial → text font

color: black → default text color

<h1>

Defines a main heading.

Used here for: City Central Library

Styled with:

text-align: center → center aligned

color: darkblue

<nav>

Represents a navigation section.

Used to hold links like Home, Books, Contact.

<a>

Defines a hyperlink.

Example:

href="#home" → links to the section with id="home"

Used for navigation inside the page.

<section>

Used to divide content into different sections.

You used:

id="home"

id="books"

id="contact"

Helps in linking and organizing content.

<p>

Defines a paragraph.

Used for text like:

Welcome message

Email info

**
**

Adds a line break (empty space between elements).

<div>

A container used to group elements.

Here it's used to center the search box.

<input>

Used to create an input field.

Type:

type="text" → text box

Placeholder:

Shows hint text inside the box

<table>

Used to create a table.

Attributes:

border="1" → adds border

width="80%" → table width

margin: auto → centers table

border-collapse: collapse → merges borders

<tr>

Stands for table row.

Each row of the table is inside <tr>.

<th>

Table header cell (bold & centered by default).

Used for headings like:

Title, Author, ISBN, Availability

<td>

Table data cell.

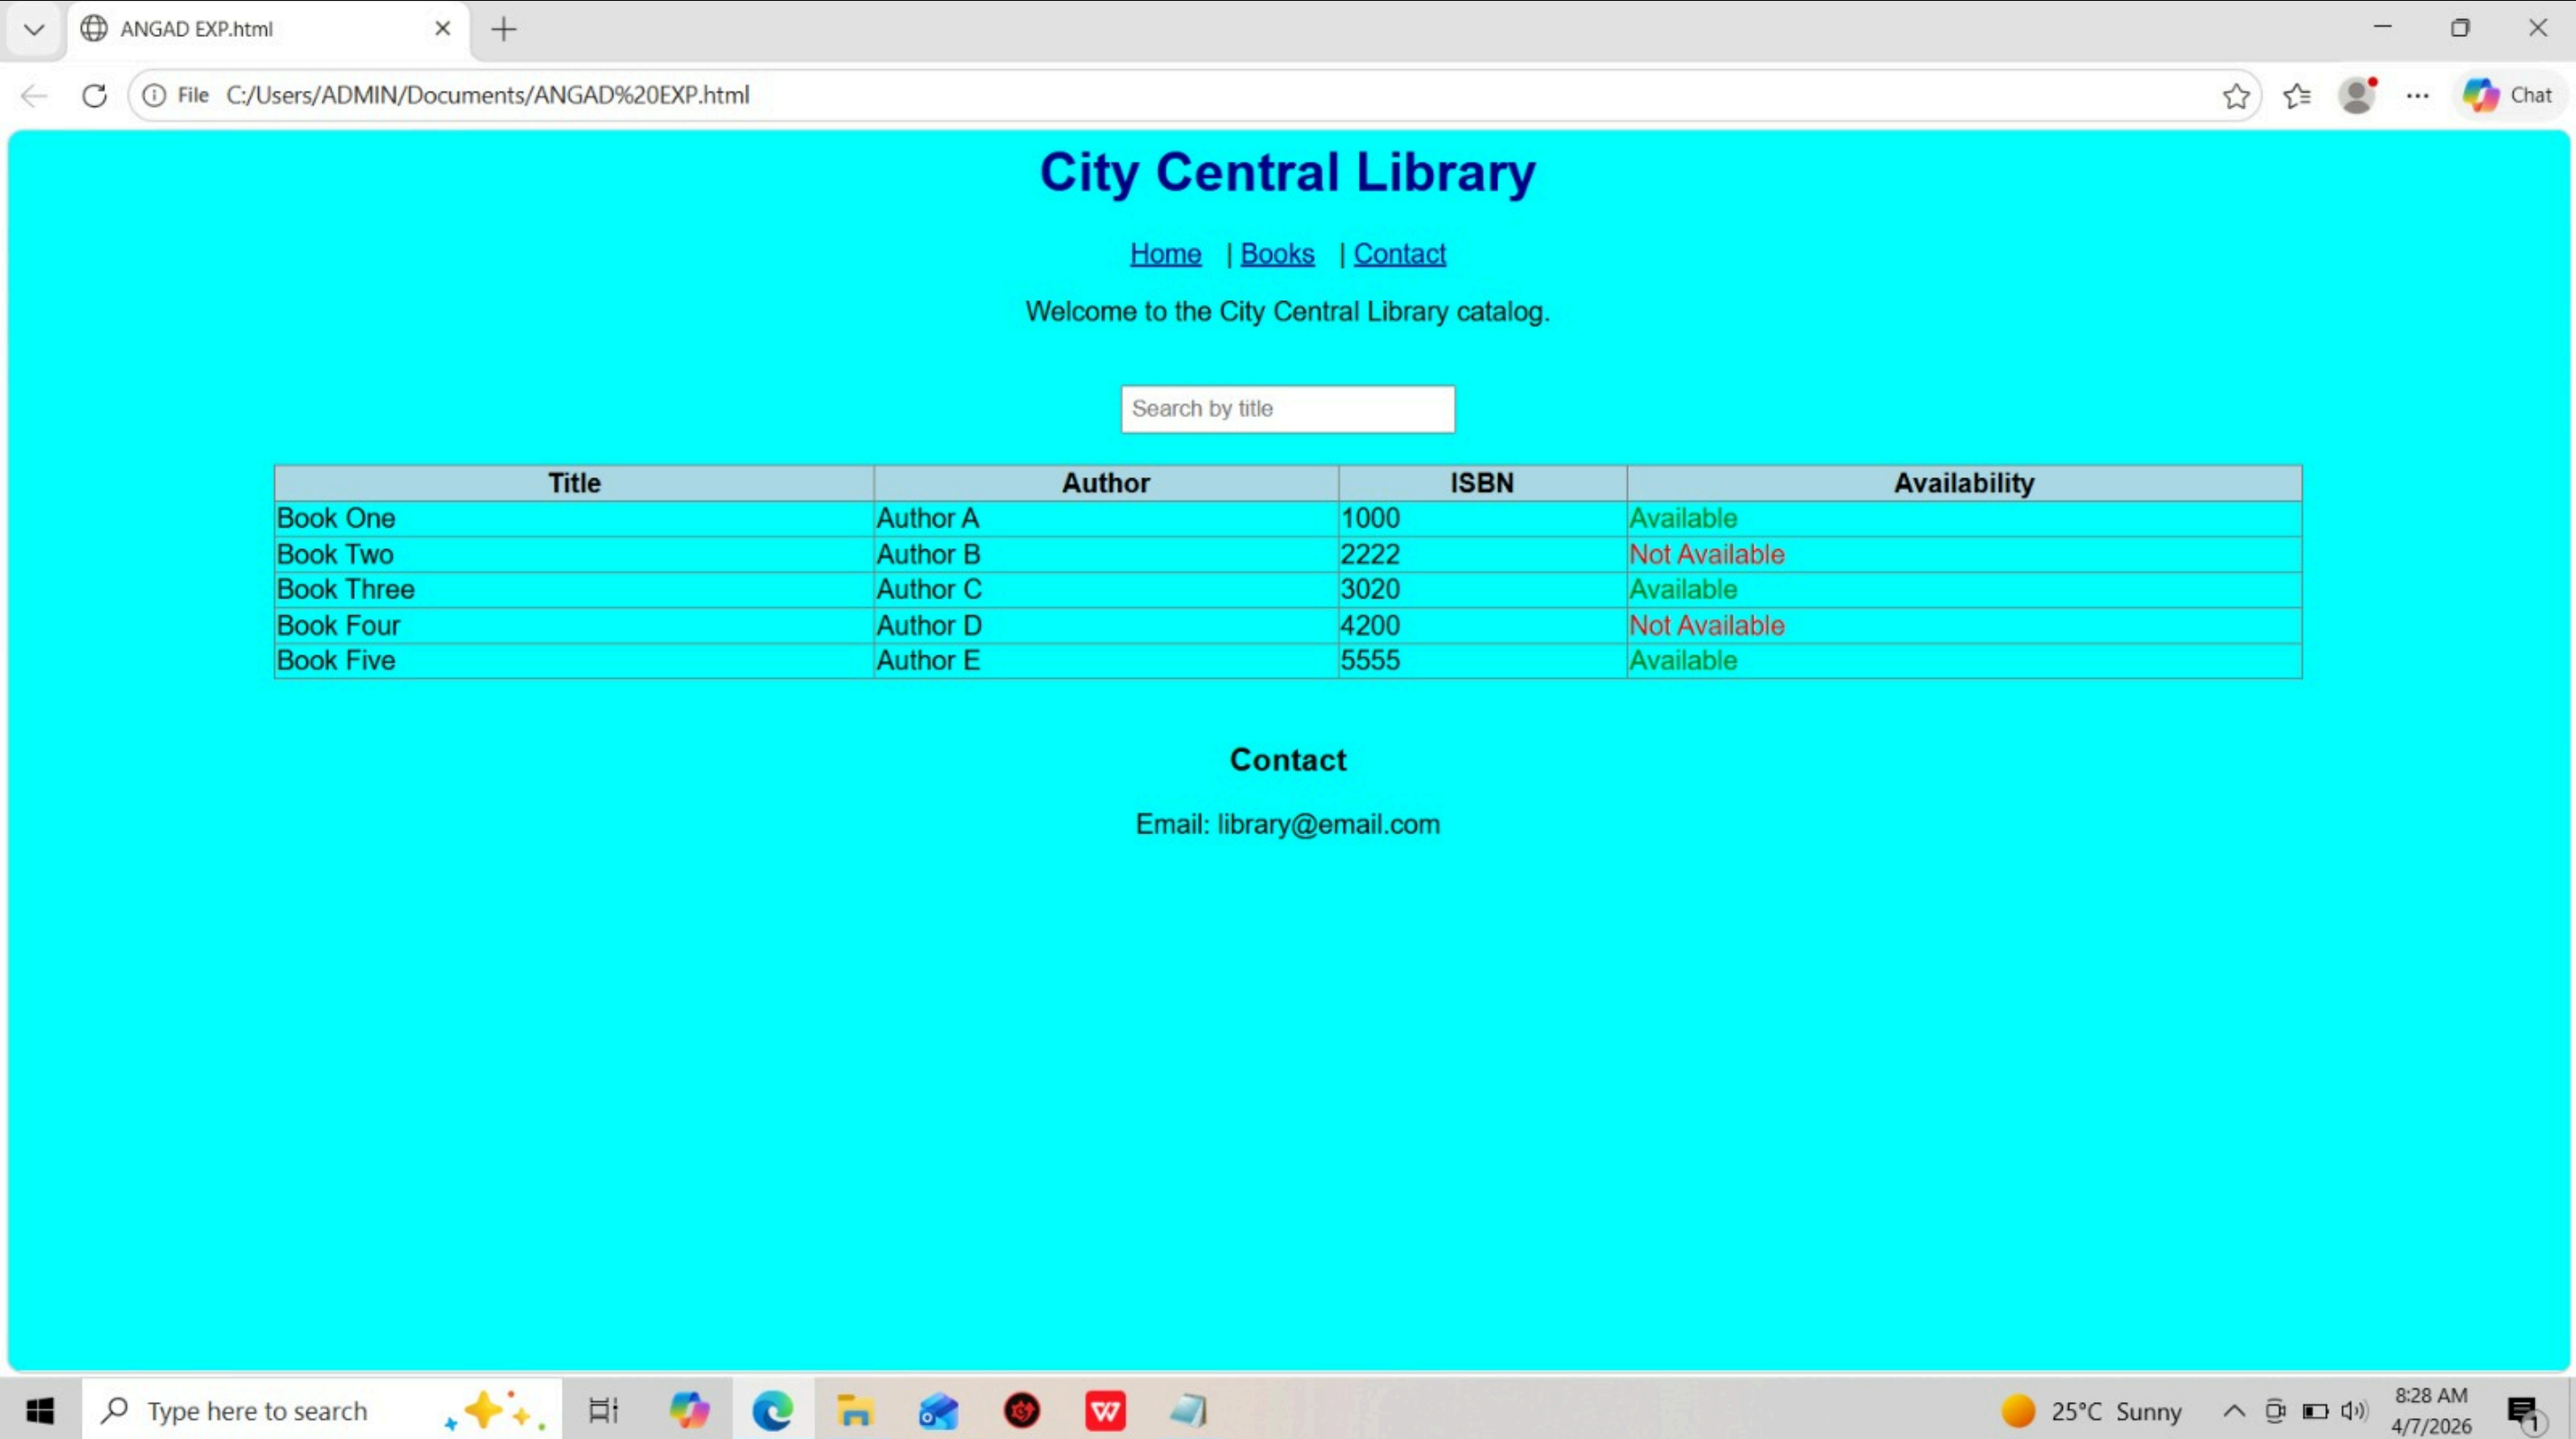

Contains actual data like book names, authors, etc.

<h3>

Smaller heading than <h1>.

Used here for "Contact".

Output :-

24mm
